**Enzymes
to
Deactivate Mycotoxins**

MEdetoxizyme

- ✦ Specific natural enzymes to detoxify mycotoxins in feed
- ✦ Effective against wide range of mycotoxins
- ✦ Stimulates the non-specific immune system
- ✦ Protecting embryo implantation rate, increasing litter size of sows
- ✦ Prevents huge economical losses from mycotoxicosis

Preventive dose : 0.5 kg / ton of feed
Curative dose : 1kg / ton of feed

Note: Products will not be offered nor will be supplied to countries where concerned products are protected by Patents. It is the purchaser's responsibility to ensure that the product(s) requested are not covered by patent in their country.

Medetoxizyme

MEdetoxizyme is a blend of toxin degrading enzymes on a suitable toxin binding carrier which detoxifies a wide range of mycotoxins from feed. Other toxin binders available in the market contain bentonite, microbes & MOS which are effective only on AFB1 and not on other mycotoxins. MEdetoxizyme contains specific natural detoxifying enzymes with a carrier HSCAS making it much more effective against aflatoxins and other mycotoxins.

ACTION

- * The natural detoxifying enzymes in MEdetoxizyme act on the mycotoxins and change their chemical structure thereby deactivating their mycotoxic property.
- * MEdetoxizyme contains
 - * Epoxide reductase - deactivates T-2, DON, Trichothecenes, Vomitoxin.
 - * Esterase - deactivates F-2, Fumonisin.
 - * Peptidase - deactivates Ochratoxins.
 - * AFB1 Carbonyl reductase - deactivates Aflatoxin B1.
- * All the four detoxifying enzymes are heat stable.

MEdetoxizyme EFFECT

- * Against mycotoxicosis causing serious health problems and huge economic losses.
- * Against immunosuppression, crop erosion, fatty liver and feed refusal, swollen kidneys, toxic changes in kidneys & cystic inflammation.
- * Against bursa regression.
- * Reduces adverse effects of mycotoxins on egg production in layer birds.
- * Protects embryo implantation rate, increasing litter size of sows.
- * Stimulates the non-specific immune system.
- * Decreases mortality rate.

ADVANTAGE

- * Highly cost effective in comparison with other toxin binders available in the market.

RECOMMENDED DOSAGE

- * Poultry & Pigs
 - * 0.5 Kg/MT to 1 Kg/MT of feed.

PRECAUTIONS

- * Need to wear face mask and gloves while handling MEdetoxizyme.

ADVERSE REACTIONS

- * Not noticed

PACKING

- * 10 Kg Bag
