Organic / Chelated Amino Acids Fertilizers

Organic / Chelated Amino Acids Fertilizers (replacement To Urea 46% For All Crops) ECOGOLD SRIMIN GOLD is a mixture of hydrolyzed protein, organic Carbohydrates and activated with Bio enzymes. Enables plants to receive direct benefits from naturally balanced nutrients and growth stimulating substances. Enhances nutritional uptake and their utilization which improves color, size, luster and taste of fruits and vegetables. It works as a biologically active protein for all crops. We have made **ECOGOLD SRIMIN GOLD** as a special product based on nutrient study for Tobacco, Soya Bean Special, Cotton, Tea, Pulses, and for Vegetables also. It is also available in granular form.

COMPOSITION:

- Total Dissolved Solids 50-52%
- Hydrolyzed Proteins 19-21%
- Organic Carbohydrates 5-6%
- Organic Nitrogen 5-6%
- Other Organic Nutrients 10-11% (In Gluconate form)

ADVANTAGES :

- A mixture of 25 essential Amino Acids.
- Induces flower and fruit formation.
- Micronutrients with Glucose as a carrier material helps crops absorb nutrients.
- Reduces flower & fruit drop.
- Enhances crop produce quality and increases yields.
- Completely bio-degradable, toxin-free, residue-free and suitable for flora and fauna environment.
- Highly compatible with all Chemicals & pesticides.
- NATURAL DERIVATIVE & BIO DEGRADABLE.

DIRECTIONS FOR USE:

DOSAGE:

500ml/Acre. Recommended to mix 2-3ml of ECOGOLD SRIMIN liquid per litre of water and spray in three

**ECOGOLD OR
PHOS LIQUID
FERTILIZERS
(ORGANIC
PHOSPHORUS
CHELATED WITH
PEPTIDES)**

ECOGOLD OR PHOS is a bio-available source of Phosphorus. It stimulates root development., increase stalk and stem strength, improves flower formation and seed production, more uniform and early crop maturity. Increases nitrogen (N) fixing capacity of legumes, improves crop quality, and increases resistance to plant diseases.

**COMPOSITION OF
ECOGOLD OR PHOS:**

- Organic Matter / Total Solids 50-52%
- Phosphorus chelated with peptides 5.5%
- Hydrolysed Protein 4.0 - 5.0%
- Bio-available other organic nutrients like Gluconates / Lactates / Proteinates 5.0-6.0% (Mg, K, Zn, Fe & B)

Completely bio-available & chelated hydrolyzed protein, as carrier to phosphorus, will facilitate

health and strength against stress conditions for various crops. Recommended and suitable for organic farming.

ADVANTAGES:

- **ECOGOLD OR PHOS** is in liquid form and highly soluble in water, facilitates complete absorption by the plant.
- Prevents and corrects phosphorus deficiency in all crops. Since **ECOGOLD OR PHOS** is combined with rich source of chelated amino acids it is more effective than inorganic salts and is, therefore required in very small quantities/ dosages.
- Contains amino nitrogen as carrier material and will not only help the crop to absorb phosphorus but also improves soil micro flora due to its organic nature.
- Promotes growth of healthy green leaves and reduces the intensity of chlorosis.
- Reduces withering of patches. It stops the formation of abnormal of small leaves. It enhances the plants

METRO EXPORTERS

Bio available npk 4-4-4 (replacement to inorganic npk variants completely)

Ecogold pp mix liquid is a unique emulsion formulation to supplement npk nutrients for crops. It contains readily bio-available organic form of npk which can easily be absorbed and assimilated in the plant system. It is a complete plant nutritional supplement that can substitute for chemical and inorganic npk complex fertilisers and its variants. **ecogold pp mix** is also available in granular form.

Composition:

Total solids	. . . 50- 52%
Organic nitrogen 4%
Phosphorus chelated with peptides 4%
Potassium as gluconate & lactate 4%
Other organic nutrients 2-3%
(gluconates / lactates / proteinates of mg, zn, fe, boron)	

Advantages:

- It is a complete organic plant nutritional supplement. It supplements or substitutes inorganic npk nutrients.
- It takes care of bio enzymatic conversion of proteins for better & healthier crop growth.
- It ensures npk nutrients readily available to crops especially at vegetative phase, flowering, fruit setting phases.
- Ecogold pp mix ensures npk liquid may be used along with ecogold srimin gold for foliar, drip irrigation application for excellent results in crop performance and harvest results in crop yields.
- It is toxin free, residue free and does not pollute soil and environment.

Natural derivative and bio-degradeable

Organic / Chelated Potash Fertilizers

Organic / Chelated Potash Fertilizers (Replacement Of SOP & MOP)

Ecogold Glacpot is a bio available source of potash. It increases crop yields because it enhances root growth and improves drought tolerances, builds cellulose and reduces lodging. Helps translocation of sugars and starches. Produces grains rich in starch, increase protein content of plants, and reduces water loss and wilting. Helps retard diseases and nematodes.

**ECOGOLD GLU LAC Liquid Fertilizers
(Gluconates, Lactates & Proteinates Mixture of
Calcium & Magnesium)**

Composition:

ECOGOLD GLU LAC is introduced for plants in the form of gluconates, lactates and proteinates which can be absorbed easily by a living system.

ECOGOLD GLU LAC is quickly absorbed by all crops following **foliar application / soil application**.

**Physical And Technical Composition Of ECOGOLD
GLU LAC**

- Total Solids / Organic matter : 50-52%%
- Calcium Gluconates. Lactates,
Proteinates : 10 %
- Magnesium Gluconates, Lactates, Proteinates :
10%
- Zinc Gluconates, Lactates, Proteinates :
10%
- Other micro-nutrients (Fe,Cu, B &
Mn : 10 to 11%

Advantages of ECOGOLD GLU LAC:

- It is ideal nutritional product on sophisticated bio-technology fermentation process.
- Presence of Boron in organic form prevents flower drop and enhances fruit set.
- Completely organic product and effective to replace synthetic or imported products used at final stage of crops.
- Enhances flowering, fruit set and ensures higher yields.
- Prevents and corrects nutrient deficiency in crop.
- Enhances number of fruits, fruit size & quality of the fruit with better aroma & taste.
- A complete nutraceutical and 100% Bio-available product that is toxin free and residue free.

NATURAL DERIVATIVE & BIO AVAILABLE

**Organic Chelated Zinc Fertilizers (Replacement for Zinc Sulphate)
Ecogold orzinc (zinc gluconates, Lactates & proteinates)**

Organic bio available zinc 12%

Ecogold orzinc is one of the essential micronutrients required for optimum crop growth. About 90.5% of the total zinc required as nutrition for plants move towards the roots by diffusion. **ECOGOLD ORZINC** plays an important role in many biochemical reactions within the plants.

Composition:

Zinc gluconate , lactates 50-52%
Bio-available zinc (db) 12%
Other organic nutrients 4.0%(gluconates / lactates / proteinates of mg, zn , fe & bo)

Advantages:

- **Ecogold orzinc** is based on sophisticated fermentation process and is completely bio-available to all crops.
- **Ecogold orzinc** in normal photosynthesis in plants since zinc is directly or indirectly involved in several enzyme systems, auxins and protein synthesis.
- Promotes growth of healthy green leaves and reduces the intensity of chlorosis.
- Enhances flower formation fruitset, seedset and maturity rate which improves the yield.
- **Ecogold orzinc** with glucose as carrier material provides strength and resistance to the crop.
- **Ecogold orzinc** is in liquid form and highly water soluble thus facilitates complete absorption by the crops.
- **Natural derivative & bio degradable.**

Direction for use:

Dosage : 500ml / Acre. Recommended to mix 2-3ml of **ECOGOLD ORZINC LIQUID FERTILIZER** per litre of water and spray in three different stages crop growth, vegetative, flowering and fruiting stages. The

ECOGOLD PACIL is a Bio Control Agent Plant PARASITIC NEMATODES cause significant losses to a wide variety of crops. Chemicals control is a widely used option for plant parasitic nematodes management. **ECOGOLD PACIL** is an **ECO-FRIENDLY & ORGANIC** alternative to use of chemicals for controlling nematodes and aphids and other insects & pest.

COMPOSITION:

Paecilomyces Liliacinus 1.0% W.P. Contains at least $(2 \times 10)^6$ colony forming units (CFU) per gram dry weight.

DIRECTIONS FOR USE:

SEED TREATMENT:

Prepare slurry by mixing 5 to 10 grams of **ECOGOLD PACIL** in 25 ml of water and use this to coat 1kg of seeds. The coated seeds are to be dried in shade of 30 minutes before sowing them in field.

Before transplanting seedlings: Mix well **ECOGOLD PACIL** at the rate of 10 grams per liter of water and dip roots of seedlings for 15- 30 minutes before transplanting them in field.

Nusery bed treatment : Mix well **ECOGOLD PACIL** in water at the rate of 250 grams in 50 litres of water and soil drench to cover entire nusery area of 500 square meters (1.25 cents)

Field application : Mix application **ECOGOLD PACIL** 1kg in 25 kg farm yard manure (FYM) and broadcast it in 4000 meters (one acre). If **ECOGOLD PACIL** mixture is incubated with FYM for 7 days in a cool under place under shade and covered with a wet jute bag before broadcast application, the performance for **ECOGOLD PACIL** improves dramatically.

PACKAGING:

Available in 1 Kg pack - 10 packs in a Carton.

METRO EXPORTERS

Organic Farm Manure

ECOGOLD ORMAN MANURE is enriched with NEEM, CASTOR & PONGAMIA Orman is enriched with mycorrhizal fungio like Aculospora, Glomus, Scutellospora, Gigaspora, Sclerocystis etc. These mycorrhizal fungi improve plant uptake of phosphorus and other nutrients leading to profuse root growth and promoting rhizobacteria (PGPR) to maintain high population levels in **ECOGOLD ORMAN**

COMPOSITION:Total Nitrogen as N 1.8%, Total Phosphate as P₂O₅2.0% Total Potash as K₂O 1.4%, C:N ration 10.1%, pH 7 to 8

ADVANTAGES OF ECOGOLD ORMAN MANURE:

- **ECOGOLD ORMAN** is an organic fertilizer and consists of press mud fortified with essential organic matter. **ECOGOLD ORMAN** is further enriched with neem, castor and Pongamia to release organic nutrients and make them totally Bio- available for plants to absorb through roots.

ECOGOLD ORMAN reduces the need for other mineral fertilizers and thus effectively alkalization of soils and improves soil structure, porosity and aeration.**ECOGOLD ORMAN** persists in all types of soil - from extreme acidity to alkalinity and is available to plants with other applied phosphorus and nitorgen fertilizers.As nutrient availability, areration porosity, moisture retention capacity and beneficial micobial populations are increased in soil due to **ECOGOLD ORMAN** application, plants grow vigorously and produce increased quantities of leaves, branches, flowers, fruits and yields. **ECOGOLD ORMAN** can be used to harvest high yields in all crops.

ECOGOLD TRICHA (Trichoderma Harzianum 2.0% W.P.)

(A UNIQUE & BROAD SPECTRUM BIOLOGICAL FUNGICIDE)

ECOGOLD TRICHA is saprophytic fungus that grows on dead organic matter and cell walls of pathogenic fungi, endollucanases etc; these enzymes by **TRICHODERMA HARZIANUM** helps it dissolve the cell walls of all kinds of Pathogens. It also inactivates enzymes produced by pathogens to invade plants.

Composition: Active ingredient: **TRICHODERMA HARZIANUM** strain NBRI-1055 approved.

Contains at least 2×10^6 colony forming units of (CFU) per gram dry weight.

Shelf life: 12 months.

DIRECTIONS FOR USE:

SEED

TREATMENT:

Prepare sulrry by mixing 5 to 10 grams of

ECOGOLD TRICHA in 25ml of water and use this to coat 1kg of seeds. The coated seeds are to be Dried in shade for 30 minutes before sowing them in the field.

BEFORE TRANSPLANTING SEEDLINGS:

Mix well **ECOGOLD TRICHA** @ of 10 grams per litre of water and dip roots of seedlings for 15-30 minutes before transplanting them in field.

nursery bed treatment:

mix well **ECOGOLD TRICHA** in water at rate of 250 grams in 50 litres of water and soil drench to cover entirely the nursery area of 500 square meters (1. 25 cents)

FIELD SOIL APPLICATION:

mix **ECOGOLD TRICHA** 1kg in 25 kg FARM YARD MANURE and broadcast in 4000 SQ.M . THIS MIX WITH THE FARM YARD MANURE CAN BE INCUABTED
